

PrestaShop 1.7.6: NEWS & IMPROVEMENTS

PrestaShop 1.7.6 helps merchants to succeed in their business more than ever by delivering more performance, providing new tools for better conversion & customer acquisition, and also by accompanying them in growing internationally.

SEO OPTIMIZATION

- **Product combinations:** all combinations now have the parent product's URL (canonical URLs); The parent product's URL displays the default combination, there is no redirection anymore.

FRONT OFFICE IMPROVEMENTS

- **Improved catalog mode** for showcase websites, you can now choose to display or hide the prices on the website.
- **Prices & taxes project** for a better and clearer display of the order of the price details (product, shipping, taxes, etc.) on all steps of the checkout:
 - Bug fixes for B2B, specific customer groups and no tax configurations
 - Improvements on add-to-cart pop up, cart price details, order confirmation
- **Fixed front-office design bugs** and some integration improvements:
 - Footer: bug fix on contact emails when they're too long
 - Products:
 - > Improved "web only" label display
 - > Fixed image dimensions in Product Card view
- **Checkout:** image size limited on all steps for a better display

BACK OFFICE NEW FEATURES AND OPTIMIZATIONS

- A **"price (tax incl.)" column** added to the product list to gather all prices in the same place. Get both tax included and excluded prices for each of your products
- **Design section of the back office** has been redesigned. Benefit from an overview of all design features (RTL, logos, favicon and theme) and manage them the way you want
- Improved **employee profile menu**
 - Five new tabs added: Resources, Training, Find an expert, PrestaShop Marketplace and Help center
 - The profile picture is now displayed
- Several **back office design issues** fixed or improved:
 - Fixed quantity placeholder issue in the stock management listing
 - Improved mobile display
- Several helper cards added on specific pages to help new merchants get a quicker onboarding on PrestaShop

OTHER IMPROVEMENTS

- New "modern" template design and wording for all transactional emails along with a new email template generation system and a new back office page dedicated to email management (in Design > Email theme)

NEW & IMPROVED CORE MODULES

- **Faceted search:** massively refactored module and new features added, including the awaited price slider on the website
- **Customer reviews** with Rich Snippets: new native module available
- **Image slider module** improved for a better display on all devices
